Subject: Re: Final draft Qs/As for Dimock

Dennis, only noted some very, very minor grammatical items for consideration:

Q: Has EPA reached any conclusions in Dimock? next to last sentence, "potential" should be changed to potentially...

Q: What about methane levels and potential risk of explosion? fifth sentence, replace "than" with that...

Q: Why did EPA reject some of the data? last paragraph, next to last sentence, did you mean "measured" instead of measure?

Q: From how many wells were samples taken for the isotopic testing? place a comma after methane,...

Q: How did EPA choose which homes to sample? Why weren't all 64 wells included in this sampling...may want to consider replacing "its" for the, used by the Agency in its national...for the first time that you introduce the name of the study.

I really appreciate all of the help that you have done and are doing in helping OPA with the desk statements, etc.

Subject: Final draft Qs/As for Dimock

Shawn has asked that we try and finalize Qs/As by cob Friday. The attached draft captures all comments I had previously received. For those of you who may be around and can take some time to do a read/review of this final draft I would appreciate it. This document is going thru a concurrent review in HQ. Please send any comments to me asap but preferably by 3 pm so I can finalize by the end of the day tomorrow. Thanks for the support, dennis.
